

Our BC-01 is a board carrier attachment designed for slab scissor lifts

Key Features

- Securing bar to keep panels secure whilst elevating
- 60kg capacity
- Large trough
- No tools required to fit or remove the attachment
- Indoor use only

Benefits

- Aids operatives with the safe elevation of board type materials to height
- Improves productivity and reduces manual handling issues
- Reduces mepw handrail damage
- Complies with HSE regulations and guidance

Compatibility

- Compatible with all scissor lifts being used indoors (zero wind speed)
- Typical applications are slab scissor lifts from 13 ft upwards

Guidance

When using the BC-01 material handling attachment, mewp users should assist in satisfying the following:

i. PUWER - requires that the work equipment provided is "suitable for use". ii. LOLER - requires that lifting equipment (any equipment... including accessories ... used at work for lifting or lowering loads) is sufficiently strong and stable, positioned or installed to prevent the risk of injury and visibly marked for its safe use (SWLs etc). Evidence of a thorough examination must be provided. iii. Industry Guidance - HSE information sheet CIS58 "The Selection and Management of MEWPs" states that an "appropriate material handling attachment" should be considered to "reduce the risk of overturning and remove the need to balance materials on the MEWPs handrails and minimise the risk of injury due to manual handling".

BC-01 Technical Specifications

- Maximum working load-60 kg
- Attachment weight -12.6 kg
- Material securing bar and chain
- Trough depth-75 mm
- Safely accommodates materials up to a maximum dimension of 2500 x 1250 x 75 mm
- Maximum product dimensions- (w)133 x (l)131 cm (closed)
- 24/7 365 days a week product after sales support
- Secured onto the machine using 3/8" locking pins
- Fully adjustable top and centre rails to accommodate different railing heights
